PROYECTO **CULTURAL, CIENTÍFICO Y COLECTIVO** DE NACIÓN

Prueba de fuentes regulares

Prueba de fuentes regulares

Prueba de nuevas familias de fuente Ancizar

Familias de texto normales Ancizar

- Texto normal
- TEXTO NORMAL MAYÚSCULAS
- **Texto en negrilla**
- **TEXTO NEGRILLA MAYÚSCULAS**
- *Texto en cursiva*
- *TEXTO EN CURSIVA MAYÚSCULAS*
- Texto en versalitas
- TEXTO EN VERSALITAS MAYÚSCULAS

Prueba de bloques

texto texto

Block contain stuff

The body of the block. that is pretty long actually look it goes over two lines by now hopefully. The block is used for definitions and whatnot

Alert block

OHHH SHIITTT, this must be really important.

Example block

An example of something awesome.

$$\int_{\Omega}^{\infty} f(x)d\mu \tag{1}$$

$$\dot{\phi}^h = \min_{\dot{\phi}\in\mathbb{R}^{n_l}} \left\{ \left\| \mathbf{r}(w, \mathbf{b}, \dot{\phi}) \right\|_2 \right\}$$

$$= \min_{\dot{\phi}\in\mathbb{R}^{n_l}} \left\{ \sum_{i=1}^{n_s} \sqrt{w_i \mathbf{r}_i^2} \right\} = \min_{\dot{\phi}\in\mathbb{R}^{n_l}} \left\{ \sum_{i=1}^{n_s} w_i \mathbf{r}_i^2 \right\}. \tag{2}$$

There Is No Largest Prime Number

THE PROOF USES *REDUCTIO AD ABSURDUM*.

Theorem ()

There is no largest prime number.

Proof.

1. Suppose p were the largest prime number.

4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

There Is No Largest Prime Number

THE PROOF USES *REDUCTIO AD ABSURDUM.*

Theorem ()

There is no largest prime number.

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.

4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

There Is No Largest Prime Number

THE PROOF USES *REDUCTIO AD ABSURDUM.*

Theorem ()

There is no largest prime number.

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.
3. Then $q + 1$ is not divisible by any of them.
4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

There Is No Largest Prime Number

The proof uses *reductio ad absurdum*.

Theorem ()

There is no largest prime number.

Proof.

1. Suppose p were the largest prime number.
2. Let q be the product of the first p numbers.
3. Then $q + 1$ is not divisible by any of them.
4. But $q + 1$ is greater than 1, thus divisible by some prime number not in the first p numbers. □

The proof used *reductio ad absurdum*.
